Substring ▾

SUBSTRING

Write a Java program to create a substring from a given string.

PROGRAM EDITOR

Java ▾

Run

Save

```
1 import java.util.Scanner;
2 public class Main {
3     public static void main(String[] args) {
4         Scanner sc = new Scanner(System.in);
5         String str = sc.nextLine();
6         int start = sc.nextInt();
7         int end = sc.nextInt();
8         if (start >= 0 && end <= str.length() && start < end) {
9             String sub = str.substring(start, end);
10            System.out.println(sub);
11        } else {
12            System.out.println("Invalid indices");
13        }
14        sc.close();
15    }
16 }

Compare ▾

COMPARE

Write a Java program to compare two strings lexicographically.

PROGRAM EDITOR

Java ▾

Run

Save

```
1 import java.util.Scanner;
2 public class StringComparison {
3     public static void main(String[] args) {
4         Scanner sc = new Scanner(System.in);
5         String str1 = sc.nextLine();
6         String str2 = sc.nextLine();
7         int result = str1.compareTo(str2);
8         if (result < 0) {
9             System.out.println("'" + str1 + "' comes before '" + str2 + "'");
10        } else if (result > 0) {
11            System.out.println("'" + str1 + "' comes after '" + str2 + "'");
12        } else {
13            System.out.println("Both strings are equal");
14        }
15        sc.close();
16    }
17 }
```

OUTPUT

```
'banana' comes after 'apple'
```

INPUT

```
banana
apple
```
